“We accept and thank you for this splendid building, a building no matter how large and important this community may grow, will ever be the center of its social action and the main cause of progress we may make. The citizens of Davie will take pride in it, will maintain it and cherish it.”

C.A. Walsh, May 1918 Schoolhouse Dedication Ceremony

Mission Statement
The Mission of the Old Davie School Historical Museum is to collect, preserve, interpret and educate people about the heritage, culture, and history of the Davie community and western Broward County.

Basic Information

Address: 6650 Griffin Road – Davie Florida 33314

Phone Number: 954-797-1044

Hours:
Tuesday through Saturday 10am – 4pm
Sunday & Monday CLOSED

Admission Fees:

Museum & Historic Houses
$10 adults
$7 seniors, children

Step-Back-in-Time Virtual Edition
$30 per class of 30 students
$45 including 30 minute Virtual Tour and Q&A

Step-Back-in-Time School Program
$7 students
1 chaperone per 10 students required & admitted at no charge
$5 Additional Chaperones

Dear Valued Educators,

Thank you for incorporating the Old Davie School Historical Museum as a resource for your curriculum! Now more than ever we are excited to bring history alive for your students—whether in person at the Old Davie School or online as virtual pioneers on a new frontier of learning!

Since its construction in 1918, the site has served as a center for educational services—either as a school, school board offices, or now as a museum. Our ongoing goal is to continue to be of use to the community, teachers and students alike.

This curriculum guide serves as a tool for both in-person a virtual programming—to prepare your students with lesson plans and activities that introduce the new concepts and themes they will encounter. There are also opportunities to reinforce these ideas after your visit in the classroom and at home. Additionally, we would like to invite teachers to visit the site before your class trip to better acquaint yourselves with the exhibits and buildings on our campus. *These site visits are offered at no cost and by appointment only.*

As educators, you serve as a model for your students while visiting the museum and we hope to encourage young students to actively pursue learning about the past! Please let us know how we can best help you and your students.

We are looking forward to working with you now and in the future!

*Old Davie School Historical Museum Staff*
Get ready for Old Davie School's Virtual Learning Opportunities

Step Back In Time - Virtual Edition

A twist on our traditional Step Back in Time program, we bring the time travel to you!

Learn about a day in the life of a young Florida pioneer 100 years ago -

- 30-minute video presentation
- Teacher’s Guide with student activities, games and discussion questions
- 30-minute Live Zoom with a costumed docent in the 1918 classroom available for additional fee

Pricing: $30 per class / $45 with optional Live Zoom

Other Activities can be GEARED TO YOU!

We will work with you to tailor a program for your classroom’s specific needs!

Subjects can include Florida Citrus, Pioneer Chores, Historic Homes, etc.

Timeframe & Pricing Negotiable

Contact Kim at education@olddavieschool.org or Call 954-797-1044 to Schedule your program today!
Guidelines for Teachers & Chaperones

- We recommend visiting the Old Davie School Historical Museum before your scheduled field trip to familiarize yourself with the content of the exhibits, as well as the layout of the grounds. Pre-visits are available Tuesday-Saturday from 10am-4pm by appointment at no cost for teachers.

- We require one chaperone per ten students.

- We understand a field trip may disrupt the regular schedule of your school day—especially a typical lunchtime. We recommend a snack before the program begins. Keep in mind the program runs from 10am to noon. There are no vending machines on grounds.

- During the program, students will rotate through four activities in groups of no more than 25 each, to be accompanied by at least 2 chaperones. Make sure to have your groups determined before arriving at the Museum.

- As a model for students, we ask for cell phones to remain on silent and away during the program.

- Please stay with your group and provide student supervision throughout the activities. This allows the docents to better lead the program.

- Please provide students with clearly visible nametags to help the docents interact with your group.

- Taking photographs is an exciting part of the visit, but please be mindful during the program and encourage the students to listen first.

- Let us know what you think! Please fill out and return the evaluation included in this guidebook after your visit to the Old Davie School Historical Museum! We have also included a brief survey for students. These enable us to improve our program each year!

- Review the “Guidelines for Students” with your class before your visit.
Guidelines for Students

• While visiting the Old Davie School Historical Museum, we ask students to use “MUSEUM HANDS!” What are Museum Hands?
  o If you have a question, a Museum Hand goes straight in the air and waits for the leader to answer!
  o While visiting the exhibits, your Museum Hands stay to yourself. This is important to protect the artifacts we have to show you about pioneer life. With your help in protecting the items, we will have the artifacts for a long time to come!
  o In the activities, your Museum Hands are hands-on AND helping hands! We will have certain items to touch and activities to join in, but make sure you are listening and ready for the next direction!

• Walking feet are also required throughout the program—our floors are almost 100 years old! Also, remember to stay with your group at all times!

• While taking pictures is an exciting way to remember your visit, make sure that you are listening to the docent—that way you will be able to know what is in those pictures later!
Step Back in Time Program

This interactive program investigates life as it was for pioneers in the early twentieth century. By engaging with artifacts, photographs, and through hands-on activities, students will critically consider the rapid growth and transformation of western Broward County and the town of Davie.

Students and the school bus in 1918.
The Davie School served students through the eighth grade. The school bus provided older students the opportunity to attend the closest high school in Fort Lauderdale.
Themes

I. To explore the changing community and environment of western Broward County and the town of Davie from its natural foundations, to an agricultural economy, to the modern education hub of today.
   a. Students will experience firsthand elements of daily life in South Florida in the early twentieth century and compare/contrast to their own lives
   b. Students will determine the consequences of the Everglades drainage projects by interpreting personal accounts, photographs, and artifacts

II. To encourage historical literacy and inspire historical empathy
   a. Students will use analytical skills to better understand the past and make connections using evidence (historical literacy)
   b. Students will consider the different perspectives and backgrounds of the people and places of the past (historical empathy)

III. To actively participate in the museum experience
   a. Students will be introduced to “museum” skills, such as observing and interpreting photographs and properly handling (or not handling!) of artifacts
   b. Students will make use of the museum resources to learn about the past during their visit, as well as utilizing the pre- and post- activities to reinforce the processes of critical thinking

Step-Back-in-Time Activities
All students will experience the historic classroom & exhibit rooms during the program

**CLASSROOM**
Find your seat and listen carefully as our teacher takes students back to the classroom on the first day of school in 1918 to practice writing with a dip ink pen and there might even be a pop quiz!

**EXHIBIT ROOMS**
Take a walk through the history of western Broward! Through photographs, artifacts, and interactive activities, students will write a letter about their new home on the Everglades frontier!

Other activities may include:

**PIONEER HOUSE**
Building a life in the Davie frontier before modern conveniences was very different in the early twentieth century! Visit the replica tar-paper shack and help with the chores like washing laundry by hand!

**FARM ANIMALS**
*(72 student minimum)*
Meet the domesticated animals that live on local farms! Learn about their role and the hard work required to take care of them!

**BUTTER MAKING**
Butter making was an almost daily chore before the introduction of the refrigerator! Follow the steps and enjoy a delicious treat!

**SQUEEZING ORANGE JUICE**
Davie was well-known for its citrus groves and annual Orange Blossom Festival. You’ll learn a little about the history of the orange and squeeze your own juice using an old-fashioned press!

*While we do our best to accommodate requests, activities are subject to change and cannot be guaranteed.*
The activities in this guide can be used to meet the standards outlined by the Common Core Initiative.

3rd Grade

Reading: Informational Text
CCSS.ELA-Literacy.RI.3.3 Describe the relationship between a series of historical events, scientific ideas or concepts, or steps in technical procedures in a text, using language that pertains to time, sequence, and cause/effect.

CCSS.ELA-Literacy.RI.3.7 Use information gained from illustrations (e.g., maps, photographs) and the words in a text to demonstrate understanding of the text (e.g., where, when, why, and how key events occur).

Reading: Literature
CCSS.ELA-Literacy.RL.3.3 Describe characters in a story (e.g., their traits, motivations, or feelings) and explain how their actions contribute to the sequence of events.

CCSS.ELA-Literacy.RL.3.6 Distinguish their own point of view from that of the narrator or those of the characters.

Speaking and Listening
CCSS.ELA-Literacy.SL.3.4 Report on a topic or text, tell a story, or recount an experience with appropriate facts and relevant, descriptive details, speaking clearly at an understandable pace.

Writing
CCSS.ELA-Literacy.W.3.3 Write narratives to develop real or imagined experiences or events using effective technique, descriptive details, and clear event sequences.

CCSS.ELA-Literacy.W.3.6 With guidance and support from adults, use technology to produce and publish writing (using keyboarding skills) as well as to interact and collaborate with others.

CCSS.ELA-Literacy.W.3.7 Conduct short research projects that build knowledge about a topic.

CCSS.ELA-Literacy.W.3.8 Recall information from experiences or gather information from print and digital sources; take brief notes on sources and sort evidence into provided categories.

4th Grade

Reading: Informational Text
CCSS.ELA-Literacy.RI.4.3 Explain events, procedures, ideas, or concepts in a historical, scientific, or technical text, including what happened and why, based on specific information in the text.

CCSS.ELA-Literacy.RI.4.7 Interpret information presented visually, orally, or quantitatively (e.g., in charts, graphs, diagrams, time lines, animations, or interactive elements on Web pages) and explain how the information contributes to an understanding of the text in which it appears.

Reading: Literature
CCSS.ELA-Literacy.RI.4.3 Explain events, procedures, ideas, or concepts in a historical, scientific, or technical text, including what happened and why, based on specific information in the text.

CCSS.ELA-Literacy.RI.4.7 Interpret information presented visually, orally, or quantitatively (e.g., in charts, graphs, diagrams, time lines, animations, or interactive elements on Web pages) and explain how the information contributes to an understanding of the text in which it appears.

Speaking and Listening
CCSS.ELA-Literacy.SL.4.4 Report on a topic or text, tell a story, or recount an experience in an organized manner, using appropriate facts and relevant, descriptive details to support main ideas or themes; speak clearly at an understandable pace.

Writing
CCSS.ELA-Literacy.W.4.3 Write narratives to develop real or imagined experiences or events using effective technique, descriptive details, and clear event sequences.

CCSS.ELA-Literacy.W.4.6 With some guidance and support from adults, use technology, including the Internet, to produce and publish writing as well as to interact and collaborate with others; demonstrate sufficient command of keyboarding skills to type a minimum of one page in a single sitting.

CCSS.ELA-Literacy.W.4.7 Conduct short research projects that build knowledge through investigation of different aspects of a topic.

CCSS.ELA-Literacy.W.4.8 Recall relevant information from experiences or gather relevant information from print and digital sources; take notes and categorize information, and provide a list of sources.

CCSS.ELA-Literacy.W.4.9 Draw evidence from literary or informational texts to support analysis, reflection, and research.

5th Grade

Reading: Informational Text
CCSS.ELA-Literacy.RI.5.3 Explain the relationships or interactions between two or more individuals, events, ideas, or concepts in a historical, scientific, or technical text based on specific information in the text.

Speaking and Listening
CCSS.ELA-Literacy.SL.5.1 Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 5 topics and texts, building on others’ ideas and expressing their own clearly.

CCSS.ELA-Literacy.SL.5.4 Report on a topic or text or present an opinion, sequencing ideas logically and using appropriate facts and relevant, descriptive details to support main ideas or themes; speak clearly at an understandable pace.

Writing
CCSS.ELA-Literacy.W.5.3 Write narratives to develop real or imagined experiences or events using effective technique, descriptive details, and clear event sequences.

CCSS.ELA-Literacy.W.5.6 With some guidance and support from adults, use technology, including the Internet, to produce and publish writing as well as to interact and collaborate with others; demonstrate sufficient command of keyboarding skills to type a minimum of two pages in a single sitting.

CCSS.ELA-Literacy.W.5.7 Conduct short research projects that use several sources to build knowledge through investigation of different aspects of a topic.

CCSS.ELA-Literacy.W.5.8 Recall relevant information from experiences or gather relevant information from print and digital sources; summarize or paraphrase information in notes and finished work, and provide a list of sources.

CCSS.ELA-Literacy.W.5.9 Draw evidence from literary or informational texts to support analysis, reflection, and research.
Pre-Visit Activities

The following activities have been designed to introduce the ideas and themes students will encounter during their visit to the Old Davie School Historical Museum. Through the games, worksheets, and group discussions, students will become familiar with the names, vocabulary, and concepts that enables richer investigation and builds connections with the past.

Davie School Second Grade class in 1928.
People to Know

• **Governor Napoleon Bonaparte Broward**
  - 19th Governor of Florida from 1905-1909
  - Desired to drain the area of the Everglades to create more farmland

• **R.P. Davie**
  - Investor and landowner—bought 28,000 acres of land
  - Started the Davie Experimental Farm to determine what could grow in the new farmland of the Everglades
  - Namesake for the town of Davie

• **Hamilton & Blanche Forman**
  - Moved to the Davie area from Illinois in 1910
  - Together they started a potato farm, tended the lock on the North New River Canal, and started the first dairy in Davie, Forman’s Sanitary Dairy, where they delivered fresh milk door-to-door for the local community
  - They leased their land to the government during WWII to be used as an airfield. Forman Field is now the site of the South Florida Education Center, home to universities and schools today.

• **Frank Stirling**
  - Studied biology and horticulture and studied the damaging effects of the citrus canker
  - Managed orange groves in Davie and grew a variety of roses
  - Elected in 1925 as the first Mayor of Davie
  - Served in the Florida House of Representatives for Broward County from 1945 until the 1948 term

• **Althea Jenne**
  - Teacher in Davie from 1912 to 1942, taught in the packing house, two-room school and Davie School until her retirement
Can you find these words in the Word Search?

- **Zona**: the first name of the frontier settlement now known as Davie
- **Frontier**: the far edge of a country, where few people live
- **Canal**: a channel that is dug across land so that boats or ships travel between two bodies of water, or so that water can flow from one place to another
- **Dredge**: to scrape the bottom of a body of water to make it deeper or to find or catch something
- **Barge**: a long, flat-bottomed boat that is often towed or pushed by another boat
- **Muck**: anything that is thick and dirty, wet, sticky or slimy, especially mud or manure
- **Experimental farm**: farm used to demonstrate what crops would grow best
- **Agriculture**: the raising of crops and animals
- **Citrus**: an acidic, juicy fruit such as an orange, a lemon or a grapefruit
- **Climate**: the weather typical of a place over a long period of time
- **Grove**: a group of trees growing or planted near one another
As a class or independently, think about your visit to the Old Davie School Historical Museum and get ready to fill in the chart!

- In the first column, write what you KNOW about pioneer life in Florida.
- In the second column, write what you WANT to know about life almost 100 years ago in Davie, Florida.
- After your visit to the Old Davie School Historical Museum, write in the last column what you LEARNED and want to remember!

<table>
<thead>
<tr>
<th>What I <strong>Know</strong></th>
<th>What I <strong>Want to know</strong></th>
<th>What I <strong>Learned</strong></th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Do you want to learn more about these things during your visit?

These will be good questions to ask during your visit!

Were your questions answered? Did you learn more about the items in your K column? How can you learn more?
Frank Stirling used to drive our family to Dania Beach on a dirt road that would later bear his name. My father was born April 13, 1878 in Gallopolis, Ohio. After completing his education there, he traveled to California and lived there for a while. In time, he traveled to Deland where he found his true calling, which was horticulture—he was interested in studying the science of growing flowers, vegetables and fruits, particularly citrus fruit trees, like oranges and grapefruits. He also found his future wife, Bernice. It was there they made their first home and where my brothers, Walter, Hully and I were born.

My father worked with the state plant board advising farmers how to combat plant diseases. In the early 1900s, he came to South Florida, saw how fertile the land was and bought several acres in the Davie area. He bought a large building that had been used for a bean packing plant. This served as our first home until our new home was constructed. In 1924, we moved into our new home. It was a very strong house, built from coquina rock brought in from St. Augustine, and served as a good, safe shelter for our family and other families during some of the devastating hurricanes.

The ground was rich black muck and most anything could be grown in it. Most all families in Davie had gardens and fruit trees and that was where most of our food came from. Many families had a cow and some chickens, so we had plenty of fresh milk, butter, and eggs. My brother, Hully, did a lot of hunting and would come home with deer, quail, and wild duck from the Everglades. We did not have to go far to go fishing because we had a canal in front of our home. We would fish from the canal banks with cane poles. For bait, we found worms just by turning over a few shovels of dirt. We always loved living along side of the canal. We used it all the time for swimming as well as transportation. We kept a boat for our own recreation and the Seminole Indians would pole their canoes up and down the canal. They would use gigs to catch gar and frogs. When huckleberries were ripe, they would bring us berries and my mother would bake such delicious pies for us and for them.

We became good friends with some of the Indians, and my mother and Mrs. Frank Stranahan worked together in bringing Christianity into their lives. They got the first Baptist Church built on the reservation. Many times my Indian girl friends and their brothers would come and spend all day. We would play and go swimming in the canal, and in the evenings we would sit out on our front lawn and listen to my father tell stories. When he reached into his hip pocket, we knew he was going to play his harmonica for us and we could sing. We would chase fireflies. Another game we would play was to get into the canoes and try to pitch each other out into the water. The canoes were dugouts—very long, narrow and shallow. They were already easy to tip over, so we had to have very good balance just to get in.
The families in Davie worked hard, but we had good times too. The kids would meet at the old wooden bridge at the big canal, and jump off, and go swimming. Years later, my own sons would enjoy the same fun. We would get together for picnics with our neighbors and go to the beach for cook-outs. Much activity centered around the Davie church. We attended Sunday school and church every Sunday. One of my fondest memories was getting to church early to help pull the rope that rang the bell in the tower.

In spite of depressions, wars, hurricanes, hard freezes and floods, the Davie people prevailed. It is my opinion, we survived because we took care of each other in hard times and shared as much as we could. We rejoiced with the birth of a new baby and shared in the grief when a friend or neighbor died. Those were simple days and we did struggle to survive, but we were all so much younger then, and dreamed dreams of better times to come, and they did come!

I am so grateful to my parents for coming to Davie and making this our home. Many of us are benefitting from the fruits of our parents hard labor so long ago. Mother and Father and brother Hully are gone now and many other good friends and neighbors have died or moved away to other places. At times I can see visions of all of us together again, and I can imagine myself as a little girl playing with my friends, listening to so many wonderful stories, and hearing the magical sound of their voices and just the faintest sound of the harmonica in the distance.

Now that you have read Helen Stirling Gill’s story of growing up in early Davie, answer the following questions.

1. Why did Frank Stirling move his family to Davie?
   ____________________________________________
   ____________________________________________

2. How did the families in Davie acquire food?
   ____________________________________________
   ____________________________________________

3. What did the children do for fun?
   ____________________________________________
   ____________________________________________

4. What was the relationship like between the new settlers in Davie and the Seminole Indians?
   ____________________________________________
   ____________________________________________
My Journal

Write about your day today! Be sure to include what you do to get ready in the morning, at school and before you go to bed at night. How do you think your day might be different if it were 100 years ago?

Dear Journal,

Activity: How Do We Use Electricity?

Lesson Objectives:
- Students will recognize and discuss the many ways we use electricity today
- Students will reflect on how life might have been different before electricity
- Students will discover alternatives to using electricity

Vocabulary:
- Electricity: electrical power that is generated in special, large plants and distributed to all parts of a country through wires
- Convenience: something that makes a job or a situation easier and more pleasant

Materials:
- “Electricity” worksheet included in this guide or plain lined paper
  - Option to work together as a class on whiteboard

Procedure:
Step 1. Introduce the concept of electricity as a tool we use to make life easier by turning the lights off in the classroom. You can always turn the lights back on for discussion!
Step 2. Show students a picture of the Davie School in 1918 before electricity was installed. Point out the tall windows that let in natural light for the classrooms. Now look around your classroom and discuss other things that use electricity. How might a classroom in 1918 be different? You may also want to point out that the large windows allowed fresh cool air to move into the classroom, because there would not have been air-conditioning!
Step 3. Using the worksheet in class or as a take-home activity to continue lesson on the next day, have the students list ways they use electricity before, during and after school. These might include watching TV, video games, electric toothbrushes, dishwashers, laundry machines, microwaves, and many more!
Step 4. As a group, make a list on whiteboard with students contributing their answers and see how many different ways they use electricity during each part of their day.
Step 5. Explain how electricity helps to simplify and complete certain tasks. Explain the idea of a convenience. Ask students for other ways to complete the listed tasks—instead of using a dishwasher, wash dishes by hand; instead of watching the television for news, reading a newspaper (or for entertainment, reading a book!). Could each task be accomplished without electricity?
Step 6. Have students choose one of the activities without electricity to try for a day! Discuss how the activity effected their day.
Think about the things around your home or classroom that use electricity and when you use them. List the ways you use electricity during each part of your day!

Before School:

During School:

After School:

Think about what life might have been like before electricity. How would your day be different?

**BONUS!**
Try to spend a day using as little electricity as you can! Write a story about your experience and share with your class!

**DID YOU KNOW??**
When the Davie School was built in 1918, it did not have electricity! The building was designed with tall windows to let in light and air! Can you imagine a day in Florida without air-conditioning?
Citrus are types of fruits with a thick skin and juicy pulp like oranges, lemons, limes, and grapefruits!

WHERE DOES IT GROW?
In the United States, citrus is grown in Florida, California, Arizona, & Texas.

Find these states on the map and color them in!

Why do you think citrus does not grow in New York or Washington? The warm climate in the south provides the right environment for citrus to grow!

People use citrus for many different things. Unscramble these words to discover some different uses!

CIJEU  AMLRDAEME
REUPMFE  NYADC
ECLANRE  OICOGNK

There were more than 20 different orange groves in Davie, each with trees planted on 10 to more than 100 acres of land each!

DID YOU KNOW?
The orange blossom flower grows on the orange tree and is the state flower of Florida! Many farmers in Davie kept beehives in their orange groves to harvest honey. The bees collected the pollen from the orange blossom and made a very sweet variety of honey!

Flamingo Groves, now known as Flamingo Gardens, 1920s
Activity:  Wild or Domestic?

Lesson Objectives:
• Students will differentiate between domestic and wild animals
• Students will determine what role domestic animals play in the home and on a farm
• Students will recognize the resources animals need to survive and how they are acquired

Vocabulary:
• Domesticate: to tame an animal so it can live with or be used by people
• Wild: living in natural conditions and not controlled or cared for by humans
• Resource: something that is of value or use

Materials:
• Crayons/markers  • Whiteboard  • “Animals in the Everglades” worksheet provided with this guide
• Plain paper  • Tape

Procedure:
Step 1. Ask students to draw a picture of an animal—maybe one they have seen on their way to school or their personal favorite.
Step 2. On your whiteboard, make a chart by drawing a line down the middle and write “WILD” on one side and “FARM OR HOME” on the other.
Step 3. Invite your students one at a time to display their picture to the class and then choose where that animal lives—either jungle, desert, plains, ocean, lake or anywhere else in the wild; or on a farm or in the home. Tape the picture under the title. Continue with each student’s picture.
Step 4. Ask students what is different about the animals in the wild from the animals that live on the farm/home. These could include how they acquire the resources (food, water, shelter) they need to survive, how closely they live to or with people, or their role in their environment. This can also be an opportunity to introduce the Venn Diagram and discuss what the animals have in common!
Step 5. Discuss the term domesticated. Domestic animals live closely and depend on people to survive. They also perform “jobs” with humans, as well—cows provide milk and beef; horses and mules pull wagons and can be used for transportation; this may be difficult to think of house pets having a job, but consider companionship or security! Some domesticated animals have wild cousins—dog and wolf; zebra and horse; cat and lion! Do any animals on your list have a wild or domesticated cousin? What jobs do your domesticated animals have on the farm or home? (This is also an opportunity to discuss how wild animals would not make good pets!)
Step 6. Use the worksheet as an additional activity in class or as a take-home activity to introduce the animals found right here in the Everglades—these are animals that a student in 1918 might have seen on their way to school! Identify each animal and draw a line to whether it is wild or domesticated.
Animals in the Everglades

Pioneers encountered animals everyday in the Davie frontier. Some of these animals lived on the farm and needed the farmers to take care of them—these are called DOMESTIC animals. Other animals lived in the wilderness and survived on their own without the help of people. As pioneers moved further into the Everglades, there was always a chance to cross paths with a wild animal!

Identify the animals and draw a line connecting it to their home!

Domesticated animals help the farmer perform jobs on the farm. What jobs do these animals have?
Post-Visit Activities

The following activities have been designed to reinforce the activities students participate in before and during their visit to the Old Davie School Historical Museum.

Students gather together at the Davie School in 1938.
Activity Prompts

• You are an investor, like R.P. Davie, selling Everglades land for farming in South Florida. Design an advertisement that describes the land and opportunity and persuades new families to move to Davie.

• Choose one of the following subjects you learned about on your visit to the Museum—agriculture, transportation, animals in the Everglades, electricity, or others. Build a KWL chart and fill out the K and W columns—what you know now that you’ve visited the museum, what would you like to learn more about or what questions you still might have. Find at least two different books at your school or local library about the subject and fill in the L column of your chart. Compare your chart with a partner or group.

• Pretend you and your family have just moved to Davie to start a dairy farm. Write a letter to a friend describing your travels and what life is like on the Florida frontier.

• Using a piece of paper to represent an acre of land in Davie, plan where and what vegetables you would like to grow on your farm! Why did you choose those vegetables? How many of each would you plant and why? Research one of them and write a paragraph explaining to a friend how to plant, grow and harvest your vegetable!

• Choose one of the forms of transportation you learned about at the Museum—ferry boat, dugout canoe, train or even walking along the canal! Which would be your favorite way to travel? Write, draw or make a diorama to illustrate your trip to school on your favorite form of transportation!

• Create a skit with a group and act out one of the hardships of pioneer life in Davie—encountering wild animals, preparing the black muck soil for crops, an approaching hurricane! Research and demonstrate how the pioneers might have dealt with these situations.

• After discovering the many different wild and domestic animals that lived in the Everglades, research invasive species, like the wild hog and Burmese pythons. Discuss with a group or present your findings to the class. How are they different from native Florida species and why do they cause such problems throughout the state?
Things have changed in Davie over the last 100 years! Cut out the boxes from the additional page and paste them in the correct order!

Remember When?
Timeline of Davie History

1906

1909

1912

1918

1988
When families first arrived in Davie to farm, they held school in a packing house and then at the General Store! This building was also a post office, icehouse, and loading dock for boats!

90 students attended the first day of class at the new Davie School! The tall windows let in light and air before the school had electricity!

Governor Napoleon Bonaparte Broward wanted to drain the Everglades. By building canals, the water would drain off the land and could be used for farming.

The school was placed on the National Register of Historic Places, a list of places that are important to the history or culture of a community.

Students attended school in a two-room wooden building. The classrooms became very crowded as new families continued to move to Davie to farm.

Date: ____________
Now that you have visited the Old Davie School and learned what life was like in 1918, write a journal entry like today was your first day of school almost 100 years ago! What things did you do for fun? What chores did you help with? What did you learn at school?

Dear Journal,

Recipes from Davie Pioneers

Now that you've learned about life in Davie, enjoy delicious local recipes together as a class or encourage your students to try them at home with an adult!

Orange Dessert

Ingredients
- 1 cup orange juice
- 16 marshmallows
- ½ cup whipped cream

1. Melt marshmallows in orange juice until dissolved.
2. Chill until thickened
3. When cooled and thickened, add ½ cup whipped cream.

Lemon Poppy Seed Muffins—makes 1 dozen

Ingredients:
- 2 ½ cup flour
- ½ cup sugar
- 2 egg whites
- 1 Tbsp. baking powder
- ¼ cup margarine, melted
- 1 Tbsp. grated lemon rind
- 2 Tablespoon (Tbsp.) poppy seeds
- 1 ¼ cup skim milk

1. In a large bowl, combine flour, sugar, poppy seed, and baking powder and set aside.
2. In a small bowl, combine milk, margarine, egg whites and lemon peel. Stir into flour mixture just until moistened.
3. Spoon batter into 12 lightly greased muffin pan.
4. Bake at 400 degrees for 20 minutes or until lightly browned.

Cowboy Cookies—makes 11 dozen.

Ingredients:
- 2 cups sifted flour
- 1 teaspoon baking soda
- 1 tsp. salt
- 1 cup shortening
- 2 eggs
- 1 tsp. vanilla
- 1 cup sugar
- 1 cup brown sugar
- 1 package semi-sweet chocolate chips
- ½ teaspoon (tsp.) baking powder
- 2 cups rolled oats

1. In a small bowl, combine flour, baking soda, salt, and baking powder and set aside.
2. In a large bowl, blend together the shortening and sugars. Add eggs and beat until fluffy.
3. Add the flour mixture to the large bowl and mix well.
4. Add the rolled oats, vanilla, and chocolate chips until dough is crumbly
5. Drop by teaspoonful on to greased cookie sheet
6. Bake at 350 degrees for 12 to 15 minutes.

Recipes can be found in the Davie Historical Society’s Generations of Home Cooking cookbooks

What recipes have been passed down through the generations of your family? Are they similar to these recipes? How are they different?
Teacher Evaluation Survey

Thank you very much for choosing the Old Davie School Historical Museum as a part of your curriculum this year.

*Please complete this survey and return by mail or fax to ODSHM.*

We also have an online survey that will be sent by email following your program!

1. How would you rate your visit to the Old Davie School Historical Museum?

   [ ] 1 [ ] 2 [ ] 3 [ ] 4 [ ] 5

   lowest [ ] highest

2. What was YOUR favorite part of the Step Back in Time program?

   ____________________________________________________________
   ____________________________________________________________

3. What was your STUDENT’S favorite part of the Step Back in Time program?

   ____________________________________________________________
   ____________________________________________________________

4. What were the goals for your group’s visit to ODSHM?

   ____________________________________________________________
   ____________________________________________________________

5. Did the program meet the needs/expectations of your group? YES NO

6. What do you think we can improve on for your next visit to ODSHM?

   ____________________________________________________________
   ____________________________________________________________

7. How did you heard about the Step Back in Time program?

   ____________________________________________________________
   ____________________________________________________________

8. Was this Curriculum Guide an effective tool for your preparation and how can it be improved?

   ____________________________________________________________
   ____________________________________________________________

9. Would you be interested in other outreach programs from the ODSHM? YES NO

10. Would you recommend your school to visit again next year? YES NO
Student Evaluations

We value your student’s opinion of their experience at the Old Davie School Historical Museum.

Please allow your students five minutes to complete our survey after visiting, so we can improve on and ensure a successful program for our treasured audience of learners.

The surveys will remain anonymous, however we ask for you to please include your student’s grade level.

Send your responses to:

Old Davie School Historical Museum
Education Department
6650 Griffin Road
Davie, FL 33314

Thank you very much!
My favorite part of the Old Davie School Historical Museum was...

Activities Answer Key

**Did Davie School Vocabulary Word Search**

Can you find these words in the word search?

- Zone: the final name of the frontier settlement now known as Davie
- Frontier: the edge of a country, where few people live
- Canal: a channel that is dug across land so that boats or ships can travel between two bodies of water, or so that water can flow from one place to another
- Dredge: to scrape the bottom of a body of water to make it deeper or to find or catch something
- Barge: a large, flat-bottomed boat that is often towed or pushed by another boat
- Muck: anything that is thick and dirty, wet, sticky or slimy, especially mud or manure
- Experimental farm: a farm used to demonstrate what crops would grow best
- Agriculture: the raising of crops and animals
- Citrus: an acidic, juicy fruit such as an orange, a lemon or a grapefruit
- Climate: the weather typical of a place over a long period of time
- Grove: a group of trees growing or planted near one another

**Remember When?**
Timeline of Davie History

- 1906
  - Governor Napoleon Bonaparte Broward wanted to drain the Everglades. By building canals, the water would drain off the land and could be used for farming.

- 1909
  - When families first arrived in Davie to farm, they held school in a packing house and then at the General Store. This building was also a post office, icehouse, and loading dock for boats.

- 1912
  - Students attended school in a two-room wooden building. The classrooms became very crowded as more families continued to move to Davie to farm.

- 1918
  - The school was placed on the National Register of Historic Places, a list of places that are important to the history or culture of a community.

- 1988
  - 90 students attended the first day of classes at the new Davie School! The tall windows let in light and air before the school had electricity.

**Animals in the Everglades**

Pioneers encountered animals everyday in the Davie frontier. Some of these animals lived on the farm and needed the farmers to take care of them—these are called DOMESTIC animals. Other animals lived in the wilderness and survived on their own without the help of people. As pioneers moved further into the Everglades, there were always a chance to cross paths with a wild animal!

Name each animal and draw a line them to their home!

- Cow
- Panther
- Alligator
- Chicken
- Rattlesnake
- Dog

Domesticated animals help the farmer perform jobs on the farm. What jobs do these animals have?

Resources

Our goal is to ignite an ongoing interest in exploring the past. Included with the curriculum guide are additional resources, covering a basic timeline, a short history of Davie, as well as books and online resources for teachers and students related to the history of South Florida.

Boys swimming in the C-11 canal, also known as the South New River Canal, in 1916. The canal runs parallel and between Griffin Road and Orange Drive, however, at the time both were hardly dirt paths. The high banks show the sandy soil underneath the black muck.

Ten Things You Might Not Know about Davie

1. The first permanent settlers began to arrive in 1909 attracted by the cheap land, warm climate and rich soil. The first settlers came from Michigan, Kentucky, Canada and the Panama Canal Zone. Finding the terrain and its problems similar to those in Panama, the settlers called the new town Zona.

2. The South New River Canal (C-11, the canal in between Griffin Road and Orange Drive) was the town’s communication line to the outside world. There was only one way in and out of this growing settlement and that was by boat on the C-11 canal until 1917, when a single lane rock road was laid to Fort Lauderdale.

3. At first, the horses and mules had to wear muck shoes to keep them from sinking knee deep into the heavy wet soil of the reclaimed Everglades land. However, by the 1930s, Davie was well known for its horse and cattle pastures. James Bright, partner in opening the Hialeah Racetrack, bred and trained Florida’s first thoroughbred horses in Davie on Orange Drive!

4. The first school was held in the east room of the general store located on the canal. As more families moved into the frontier, a small two room wooden structure was built, but became overcrowded quickly.

5. In 1917, architect August Geiger designed the Davie School. The building was completed in 1918 and opened to 90 students. The school operated until 1980, then was used as school board offices before being placed on the National Register of Historic Places in 1988 and transitioned into the museum we have today!

6. The second floor of the school was a meeting room where much of the community life took place, such as potluck dinners, dances, plays, and political meetings. In 1925, 48 residents met in the auditorium to begin the process of incorporation which resulted in the election of the first mayor, Frank Stirling—namesake of Stirling Road.
7. On September 16, 1926, hurricane winds blew houses off their foundations, crops were pulled right out of the ground and left the new citrus groves destroyed. Many families left never to return. The hurricane devastated South Florida and sent it into depression three years before the rest of the country. The original gable roof of the Viele House, now located at the Old Davie School, flew off during the hurricane and was later replaced with the current hip roof.

8. During WWII, the Navy acquired land from the Forman family to erect an airfield, called Forman Field, for the purpose of training pilots to land and take off from aircraft carriers. Navy personnel soon inundated Davie and the roar of airplanes replaced the silence of the Everglades. In the 1960s, the former Forman Airfield began the transformation into the new South Florida Educational Center, including Nova Southeastern University, Broward College, McFatter Technical Institute and other educational institutions.

9. In October 1947, another devastating hurricane dumped 11 inches of rain on Davie in just 3 hours. The rising water forced residents from their homes. Army Ducks evacuated the homeless to refugee stations at Forman Field and tents provided shelter for the residents to live in until the water receded. The water remained for six weeks before leveling off. It was planting time and fields were under water, cattlemen were losing stock almost daily and roads were being washed away.

10. While a destructive period in Davie history, the 1947 hurricane initiated the development of the South Florida Water Management District and consideration for the Comprehensive Everglades Restoration Plan. These projects manage and protect the water resources of the region and seek to restore the quality and distribution of water in the Everglades.

Plans to drain the Everglades in the early 20th century with the construction of the canals completely changed the ecosystem of the natural environment. The Comprehensive Everglades Restoration Plan outlines efforts to restore the Everglades over the next 30 years.
Reading Recommendations for Students
These books provide further exploration into the themes discussed before and during your visit to the Old Davie School Historical Museum. All of the books listed are available through the Broward County Library System.

Everglades
by Jean Craighead George
This beautifully illustrated book tells the story of the creation and flourishing of the Everglades and the ultimate impact of humans on the natural ecosystem. [Grades 1-4]

Ready, Set… WAIT! : What Animals Do Before a Hurricane
by Patti R. Zelch
With the threat of hurricanes familiar to South Floridians, the story visits how humans and animals prepare for and weather the dangerous storms. The book offers access to online resources, as well as information, maps and charts on how hurricanes form and grow. [Grades P-4]

A Land Remembered: Student Edition Volume 1 & 2
by Patrick D. Smith
Adapted for students from the original novel, Patrick Smith illuminates the development of Florida over three generations of the MacIvey family. From rural farming to the land boom in the twentieth century, the novels offer an intimate look at pioneer life, success and struggles. [Grades 4+]

The Adventures of Charlie Pierce Series
by Harvey E. Oyer III
The adventures of Charlie Pierce follow a young boy’s experience in South Florida during the end of 19th century. Charlie invites students to jump into the past by exploring the natural environment of Florida and interacting with the native peoples. [Ages 8-12]
Reading Recommendations for Teachers

These books provide a broader view of Florida’s history, from the transformation of the natural environment to the rapid growth of metropolitan areas. All of the books listed are available through the Broward County Library System.

A Land Remembered
by Patrick D. Smith
Smith’s novel illustrates the harsh realities and early foundations of pioneer life on the Florida frontier. Following three generations of the Maclvey family, the story traces the transformation of the natural environment and man’s changing relationship with the land.
This original version offers a deeper look into the trials of the Maclvey family for older audiences than the adapted student edition.

The Swamp: The Everglades, Florida, and the Politics of Paradise
by Michael Grunwald
The Swamp examines the role of the government in the transformation of the Everglades, from the early perceptions of the wilderness to the efforts to restore balance to the assaulted land.
Covering more than a century of South Florida’s past, Grunwald offers an excellent introduction to considering the environment as an active player in history.

The Everglades: River of Grass
by Marjory Stoneman Douglas
Douglas’ highly regarded 1947 book illuminates the plight of the Everglades. Offering both a history and a plea for change, the book influenced the preservation of the Everglades National Park and continues to reveal the ever-present need for conservancy into the 21st century.

The History of Davie and its Dilemma
by Victoria Wagner
Wagner fulfills the need for a history of the town that she adopted as her own. By incorporating oral histories and addressing the pressing concerns of a rapidly modernizing rural area, she highlights the memories of the town called Davie, balancing on the edge of the Everglades and the growing suburban sprawl.
Online Resources

Town of Davie
